

Samsung S Voice Commands

Setting up a custom voice command can wake up S Voice without even needing to touch your device. All you have to do is say the wake-up command while S Voice is open. By default, the command to do this is "Hi Galaxy," but you can change it to something a little more your style. It's worth noting that this does not work like "OK Google" does from every screen.

1. Start S Voice by pressing the home button twice. The home button is at the bottom of the device, in the centre.
2. Tap the three dots in the top-right to bring up the menu, and tap Settings.
3. Tap Voice wake-up, then tap Set wake-up command. If you can't tap Set wake-up command, you may need to tap the switch in the top-right first.
4. The next screen will prompt you to say your wake-up command four times after tapping the microphone button. Make sure you're in a relatively quiet area before trying to do this, or else it won't recognize what you're saying.

Know the S-Voice commands

S Voice can be a little stiff when recognizing commands, so be sure you know which commands you're likely to use most often and how to say them so S Voice can be its most useful. Some of these you might not have even realized were options. Here is a list of S Voice commands and examples of how to use them.

- Voice dial - "Call Charlie mobile"
- Message - "Text Katie message Are you free tonight for dinner?"
- Search contacts - "Look up James"
- Memo - "Memo Send mom a card"
- Schedule - "New event Lunch with James July 21st at 1 PM"
- Task - "Create task Concert review due May 18th"
- Music - "Play artist The Beatles"
- Social update - "Twitter update Why do humans live so far north?"
- Search - "Google Population of Portugal"
- Open app - "Open Calculator"
- Record voice - "Record voice"
- Set alarm - "Set alarm for 6:00 AM"
- Set timer - "Set timer for 2 minutes"
- Control simple settings - "Turn Wi-Fi off"
- Navigate - "Navigate to Cambridge, MA"
- Hear news - "Read the news"
- Weather - "What is the weather for today?"
- Get an answer - "What is the highest mountain?"

S-Voice

S-Voice is Samsung's Siri. While not as intuitive, it still does a good job of taking commands and interpreting text messages. **Double tap the home key to activate.**

Here are some things you can say:

- "call [contact name]"
- "send text to [recipient] [message]"
- "navigate to [address/city/business name]"
- "driving mode on/off"
- "find [name of business]/restaurants/gas station"
- "map of [address/city]"
- "note to self [message]"
- "new task [do something]"
- "new event [event name] [time & date]"
- "record voice"
- "listen to [artist/song/album]"
- "send email to [recipient]"
- "search for [term]"
- "go to [website]"
- "open [application name]"
- "set alarm for [time]"
- "set timer for [x minutes]"
- "what is the weather for today?"
- "turn Wi-Fi on"
- "Twitter update [message]"
